

```
import java.util.Scanner;
public class P2 {

    public static void main (String[] args) // end of line comment
    {
        Scanner stdin = new Scanner(System.in);
        double userInput;
        double fahrenheit;

        System.out.println("Enter the temperature in Celsius");
        userInput = stdin.nextDouble();

fahrenheit = (1.8 * userInput) + 32;

System.out.println(userInput + " degrees in celsius is " + fahrenheit + " in
fahrenheit");

    }

}
```
